“The Core of Industrial Innovation.”

# INTRODUCTION

Precision Engineering

Industrial Solutions

Excellence Without Compromise

Eurocore Industrial Company, is a premier engineering and fabrication firm deeply rooted in the Saudi Arabian industrial landscape.

Since our inception in 2007, we have evolved from a local specialist into a comprehensive provider of fabrication, infrastructure, HVAC solutions & global steel trading. Based in Dammam & Jubail, we serve the Kingdom's vital sectors with a commitment to technical rigor, safety, and international excellence.

"The Core of Industrial Innovation."

# OUR VALUES

The mission of EUROCORE is to maintain a leading position in engineering projects specializing in designing, steel structure and mechanical sectors by providing quality services and technical competence through a team of dedicated and professional staff, all sharing the same pursuit of quality and safety.

We believe that customer satisfaction is our core asset. Thus, we maintain close relations with our clients at all levels and phases of a project to ensure that all their requirements are understood and executed on time.

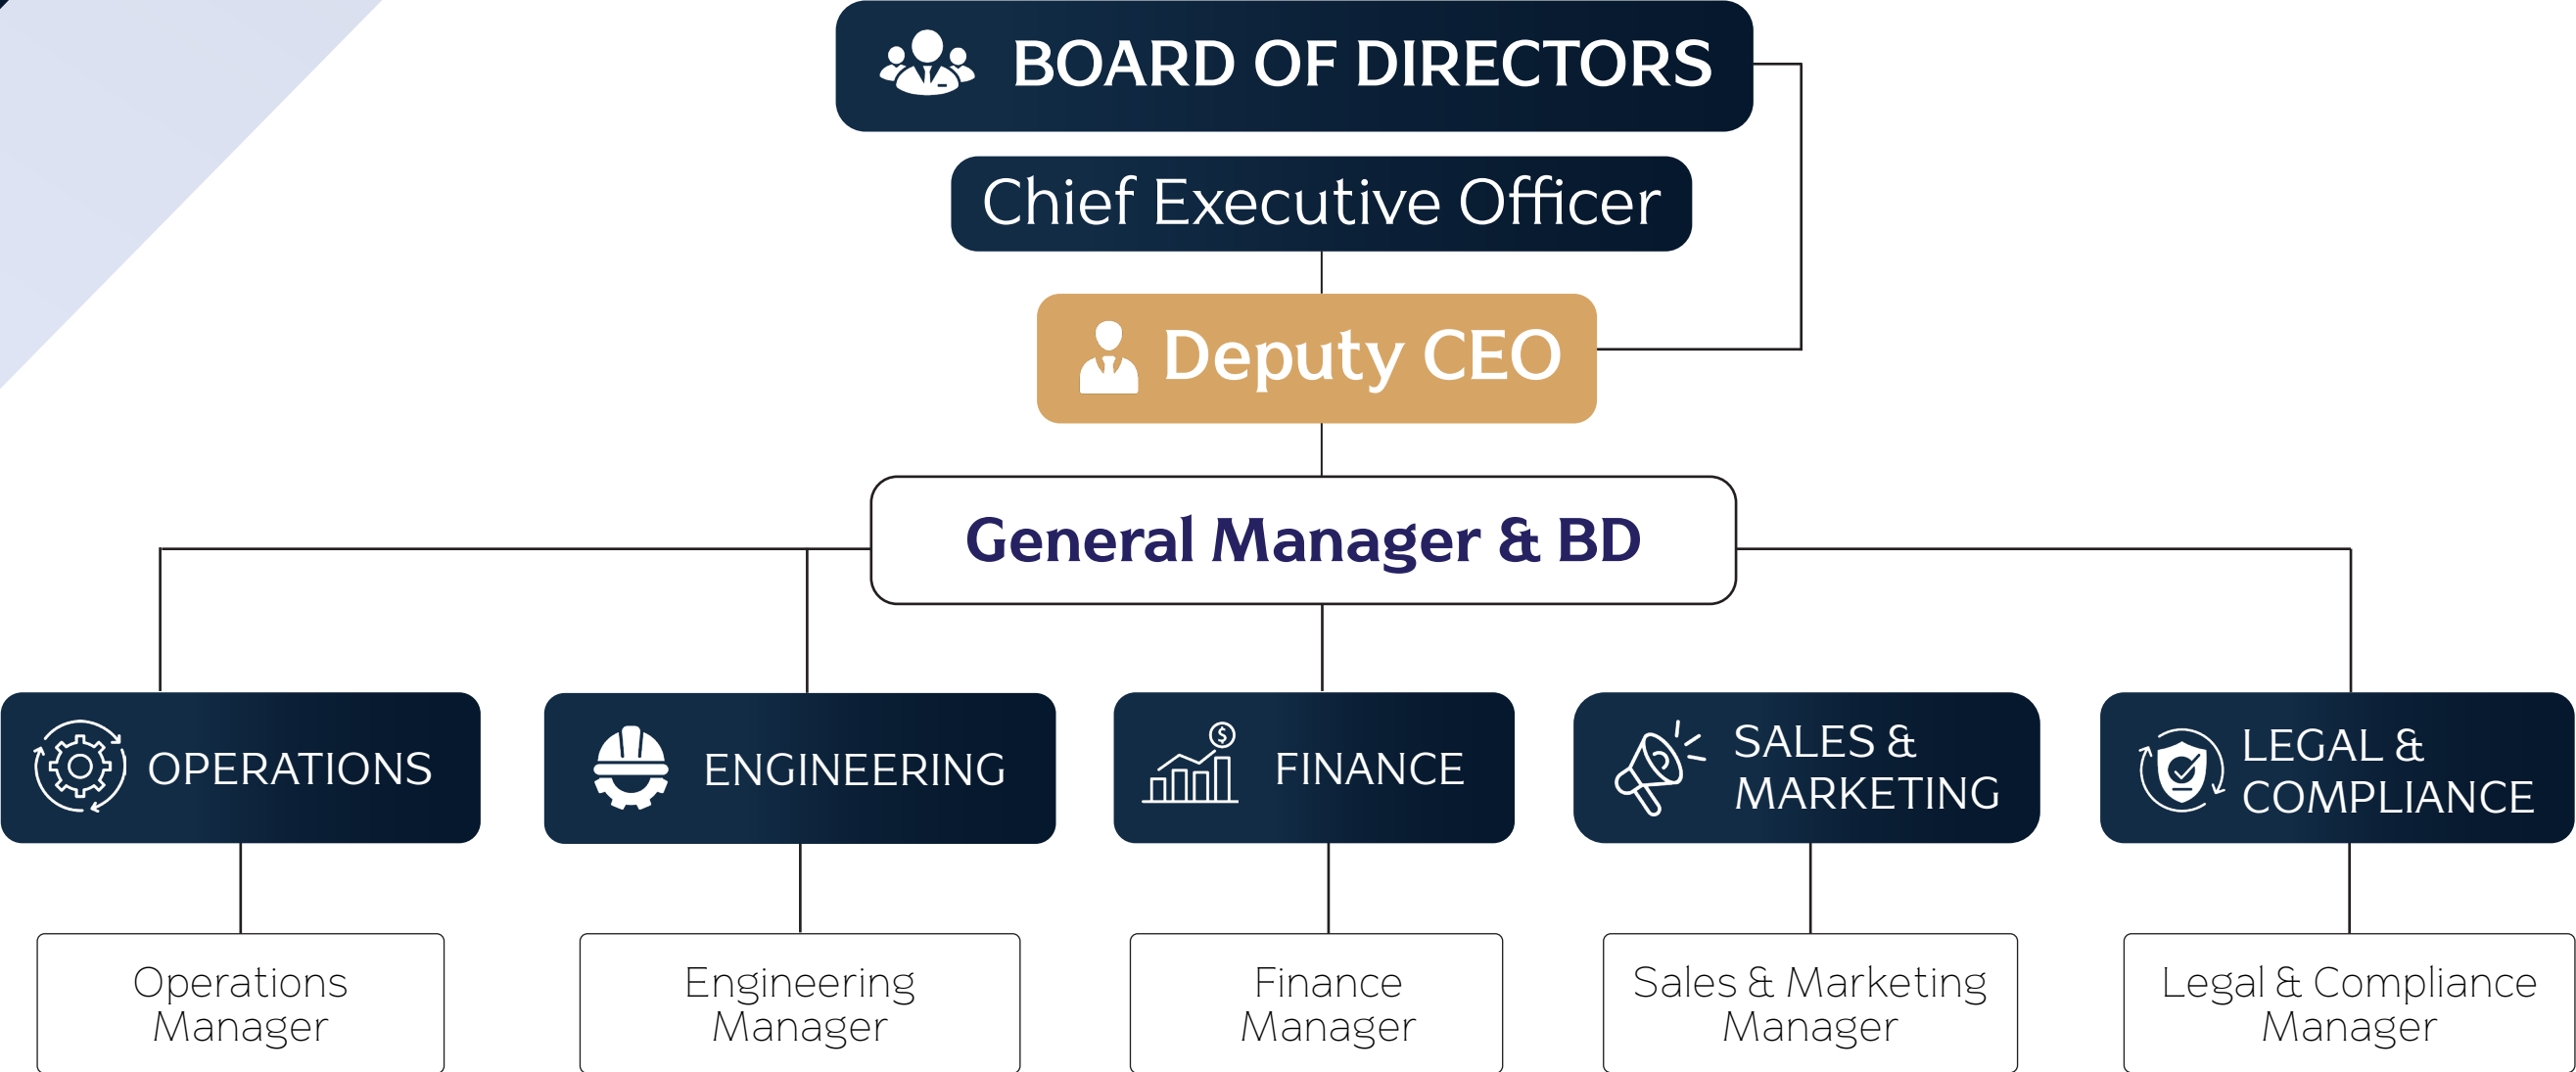

# OUR GOALS

To be recognized as a leading provider of specialized services and products across The Kingdom of Saudi Arabia by strategically partnering with world class companies with best practices of industry.

We believe in deep collaboration through technology transfer from the partner companies and sharing of our services to innovate a unique way to success

# ORGANIZATION CHART

“The Core of Industrial Innovation.”

# CORE INDUSTRIAL ACTIVITIES

## HVAC PACKAGE & DUCT MANUFACTURING :

State-of-the-art automated production of GI, Stainless Steel, and Aluminum ducting. Specialized in Spiral Round Duct systems and AHU/FCU installations following SMACNA/NFPA standards

“The Core of Industrial Innovation.”

# POWER PLANT HVAC SUPPLY , INSTALLATION & COMMISSIONING

We provide end-to-end HVAC solutions for the power sector, combining precision engineering with industrial-grade equipment to ensure optimal performance in high-heat environments.

From initial technical estimation to final commissioning, we deliver systems that prioritize operational integrity and personnel safety.

# INDUSTRIAL KITCHEN & WAREHOUSE-HVAC SOLUTIONS

Eurocore Industrial Company Ltd. provides comprehensive, end-to-end HVAC ducting solutions specifically engineered for the rigorous demands of industrial kitchens and large-scale warehouse facilities.

We combine high-performance steel and aluminum fabrication with expert technical estimation to deliver ventilation systems that ensure thermal regulation, air quality, and operational safety in high-capacity environments. From initial design to final commissioning, our turnkey approach guarantees that your critical infrastructure meets the highest industrial standards for efficiency and regulatory compliance.

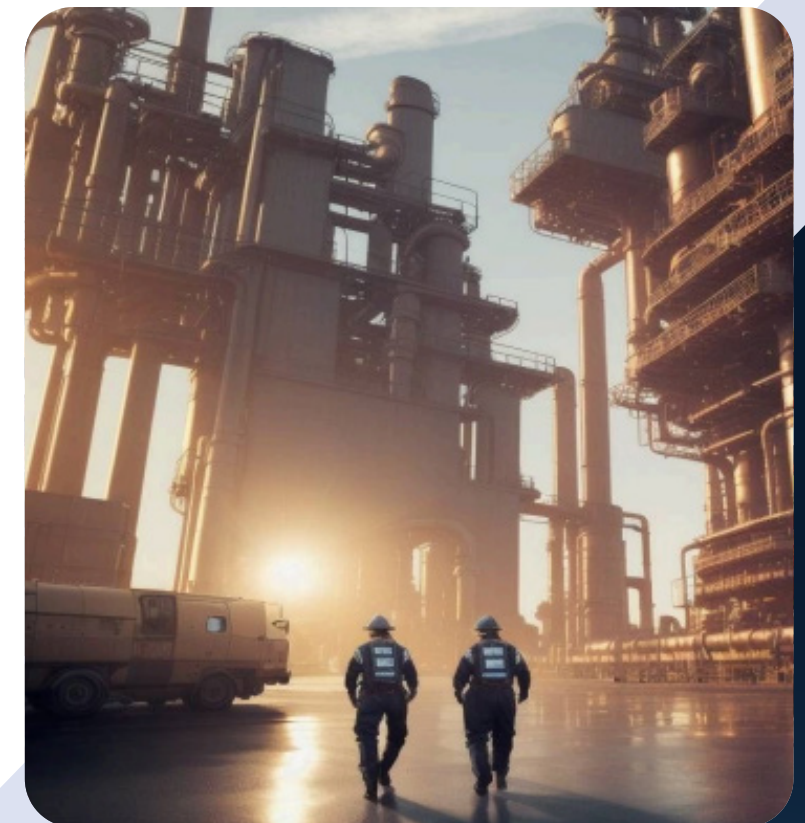

# STEEL STRUCTURAL FABRICATION & ERECTION

Provide comprehensive structural steel solutions, encompassing high-precision fabrication and expert onsite erection for large-scale industrial and commercial infrastructure.

Our capabilities range from complex structural framing and heavy-duty supports to custom industrial assemblies, all engineered to meet the most stringent safety and load-bearing standards.

By integrating advanced technical design with professional site management, we ensure that every structure—from labor camps to industrial plants—is delivered with superior structural integrity and operational excellence.

# SOLAR WORKSITE ALUMINIUM FABRICATION SOLUTIONS

Delivers high-precision aluminum fabrication solutions specifically engineered for the structural demands of large-scale solar worksites.

We specialize in the design, supply, and installation of durable, corrosion-resistant mounting structures and framing systems that maximize the longevity and performance of renewable energy infrastructure.

By merging advanced technical fabrication with rigorous project management, we provide turnkey structural support tailored to the unique environmental conditions of utility-scale solar developments.

# ALUMINIUM & STEEL TANK FABRICATIONAT FACILITY

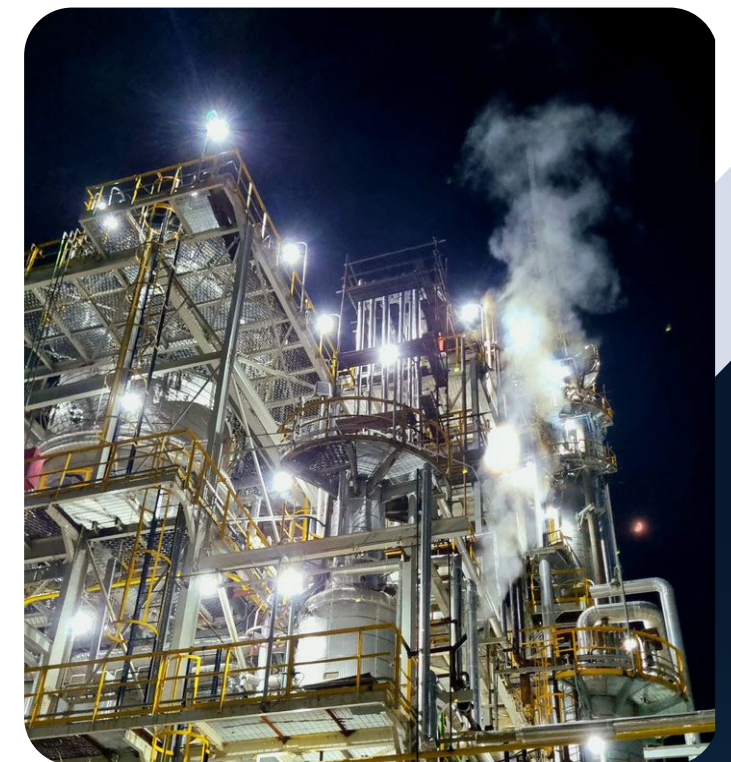

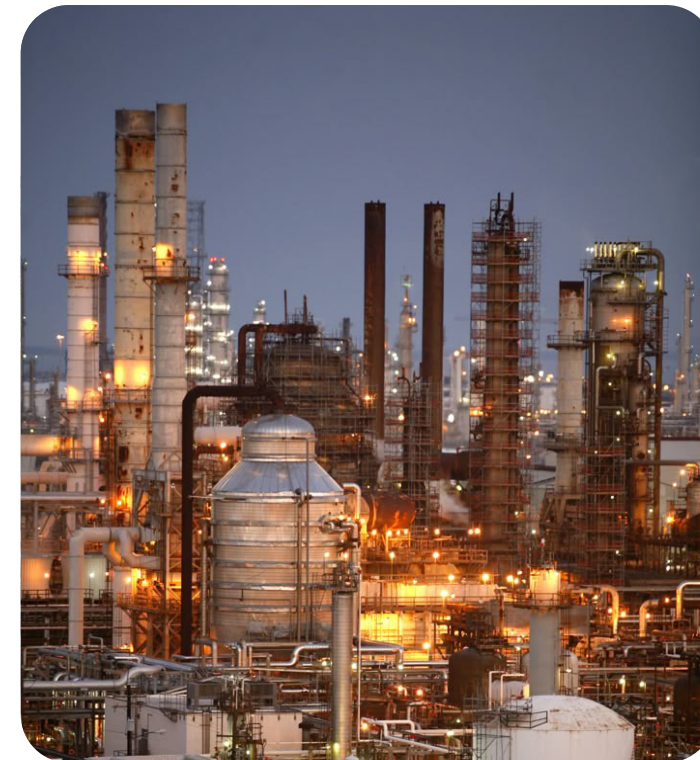

“The Core of Industrial Innovation.”

# POWER PLANT TURNAROUNDS & SHUTDOWN SERVICES

Provides comprehensive turnaround and shutdown services designed to minimize downtime and restore peak operational efficiency.

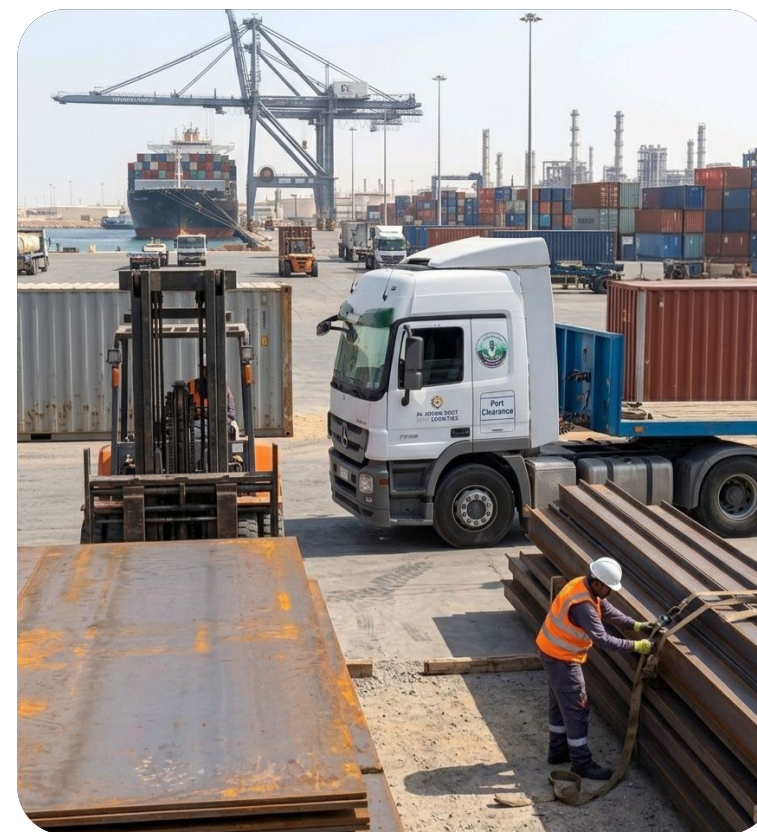

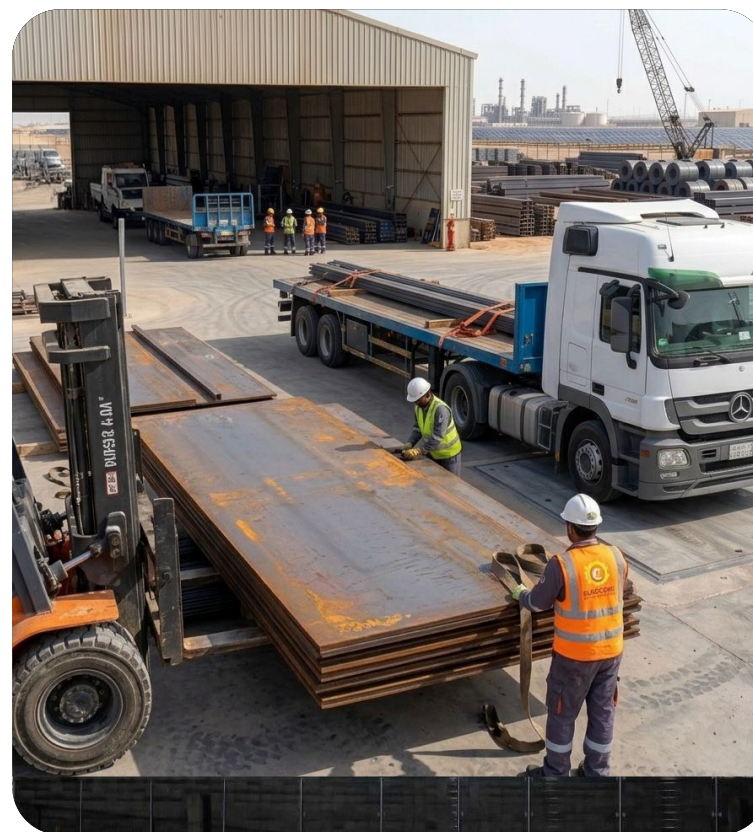

We specialize in delivering rapid-response solutions and highly skilled technical manpower for critical maintenance, complex repairs, and strategic component replacements.

By implementing rigorous project management and safety protocols during high-pressure windows, we ensure that power plants and industrial facilities transition from shutdown to full-scale production with maximum reliability and structural integrity.

# GLOBAL STEEL TRADING & INDUSTRIAL PROCUREMENT

Facilitates large-scale global steel trading, bridging the gap between world-class manufacturers and high-demand industrial sectors. We specialize in the bulk procurement of premium industrial steel grades, sourcing directly from audited production facilities in Malaysia, India, and China. Supported by robust international banking frameworks, including Letter of Credit (LC) and Standby Letter of Credit (SBLC) facilities, we ensure secure, transparent, and efficient cross-border transactions that provide our clients with cost-effective material solutions and guaranteed supply chain continuity.

# QUALITY STATEMENT

EUROCORE recognizes and understands that the full involvement of all employees is necessary to achieve all our goals. We always strive to provide quality & reliable service to all our clients.

- The Management of EUROCORE has the ultimate responsibility for establishing and maintaining quality.
- Our quality control measures are implemented in every location through individual Project Managers and all Senior Managers.
- Quality Control and Quality Assurance Engineers are assigned to each location by Project Managers/Senior Managers
- The Engineers work in conjunction with the Project Managers to ensure that the required standards and specifications are met. Daily briefings are given to the Supervisors to reinforce quality standards and objectives. All employees are encouraged to report back on quality problems to ensure that they are recorded and rectified
- Internal Non - Conformance Reports provide a common means of identifying quality concerns and methods of rectification.
- Supervisors are responsible for initiating corrective action if faults or quality problems are identified. The aim is always to eliminate the rejection of work and re-work.

# OUR PRESTIGIOUS CLIENTS

Building the Future of Saudi Arabia with Global Industry Leaders.

- **SAUDI ARAMCO**

The world's leading integrated energy and chemicals company. Euro Core provides specialized structural fabrication and plant maintenance support.

- **SABIC**

Global leader in diversified chemicals. We deliver high-precision HVAC ducting (Euro Cool™) and maintenance turnaround services for petrochemical clusters.

- **MA'ADEN**

Saudi Arabian Mining Company. Supporting the mining value chain with heavy-duty steel fabrication and industrial ventilation solutions.

- **NESMA & PARTNERS**

A Tier-1 contractor for KSA's mega-projects. We partner on large-scale infrastructure HVAC and complex industrial installations.

- **SAUDI BINLADIN GROUP (SBG)**

The Kingdom's historic construction giant. Euro Core serves as a trusted subcontractor for HVAC packages and architectural steel works.

# OUR COMMITMENT TO THE KINGDOM : VISION 2030 & BEYOND

At Eurocore Industrial Company Ltd., our mission is deeply aligned with the transformative goals of Saudi Vision 2030. We are dedicated to building the Kingdom's future by providing world-class industrial infrastructure, precision engineering, and specialized HVAC solutions for the nation's most ambitious Giga-projects.

From the futuristic landscapes of NEOM to the world-class venues planned for Saudi FIFA 2034, we stand as a key strategic partner in the Kingdom's journey toward global leadership in innovation, sustainability, and industrial excellence.

By localized expertise and global standards, we ensure that every project we touch contributes to the resilient and diverse economy envisioned by the Kingdom's leadership.

“The Core of Industrial Innovation.”

# EUROCORE STRATEGIC GLOBAL NETWORK

**Global Reach. Local Expertise. INDIA | KSA | UAE.**

Eurocore Industrial Company Ltd. operates through a highly integrated strategic network spanning India, Saudi Arabia, and the United Arab Emirates. This trilateral presence allows us to bridge the gap between global manufacturing powerhouses and the Middle East's most ambitious infrastructure projects. By maintaining local operational hubs in the KSA and UAE, supported by a robust engineering and legal framework in India, we provide our clients with seamless cross-border logistics, secure trade finance, and localized technical expertise.

Our global reach is the foundation of our ability to deliver large-scale industrial solutions with the speed and reliability that modern energy and construction sectors demand.
